

Leading the way with HA

take your muscle performance to the next level

MYODURANCE™

WITH HYALURONIC ACID, BETA-ALANINE, AND L-CARNOSINE

supports
muscular power output
normal muscle recovery
and
normal lactic acid levels

Extend your workouts the natural way

MYODURANCE™

WITH HYALURONIC ACID, BETA-ALANINE, AND L-CARNOSINE

Have you ever had to cut a workout short or had to stop running because of fatigue? This can be frustrating and detrimental to training and exercise regimens. Hyalogic combined the joint and muscle power of HA with beta-alanine and L-carnosine that support healthy lactic acid levels to form Myodurance™. This all natural supplement does not create a test positive in steroid or HGH (human growth hormone) tests and is a necessity for any athlete who wants to work harder and longer.

the science

hyaluronic acid

Hyaluronic acid is a mucopolysaccharide that occurs naturally throughout the body. Backed by thousands of clinical trials in the fields of orthopedics and eye surgery, one of hyaluronic acid's most important functions in the body is to lubricate joints as an integral component of synovial fluid.

beta-alanine

Beta-alanine is the only naturally occurring beta-amino acid that raises muscle L-carnosine levels by, on average, 80% after supplementing. L-carnosine helps to maintain healthy lactic acid levels.

L-carnosine

Carnosine is a di-peptide that binds to the hydrogen ions, thereby there are a handful of ways carnosine is thought to impact performance but its most studied function is how carnosine helps support normal recovery time after strenuous activity.

why a lozenge?

There are many reasons Myodurance™ works best as a lozenge:

- ✓ Easy to take
- ✓ Great tasting
- ✓ Easy to transport
- ✓ All-natural
- ✓ Dissolves quickly

The ingredients in Myodurance™ are easy on the stomach. This allows an athlete to take it while running, riding a bike, weight lifting, etc.

Myodurance™ makes a convenient addition to any electrolyte and energy regimen.

testimonials

"No doubt about it, Myodurance has been a big part of my training and racing regimen since first introduced last summer. The ability to have maintained power and wattage output on the bike, improved times in my run pacing while steadily raising my volume, I can only attribute it to Hyalogic's Myodurance supplementation. A great product from a great company who you can trust to use the best and safest ingredients."

"I have used Hyalogic's Synthovial Seven for years and without it, I probably could not run. So when I heard about Hyalogic's Myodurance from a friend of mine, I couldn't wait to try it. He was right! After a hard and long day of training, I take Myodurance and the next day I feel fantastic. The muscle recovery was amazing. What a difference it makes. But don't just take my word for it, give it a try for yourself. You'll be amazed."
