

Myodurance™ is an oral lozenge supplement that helps to support muscle performance, power output and normal recovery time after strenuous activity.**

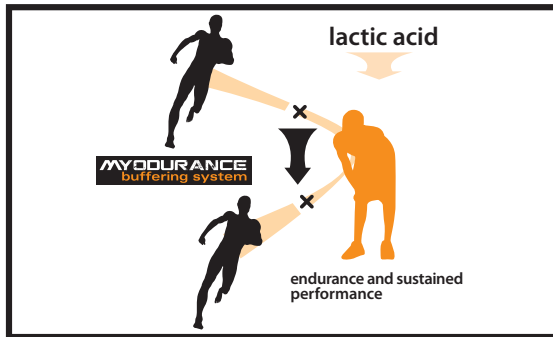

KEY FEATURES**

- All natural, easy to take, great tasting lozenge
- Perfect for on-the-go lifestyles
- With hyaluronic acid, beta-alanine and L-carnosine
- Elite formula that helps maintain healthy joints and muscles.

TARGET MARKET

Primary:

- Active and athletic adults wanting a unique, easy to take oral lozenge supplement to support muscle performance and normal recovery time after strenuous exercise or activity with the additional benefits of hyaluronic acid.

What is beta-alanine?

Beta-alanine is the only naturally occurring beta-amino acid that raises muscle L-carnosine levels by, on average, 80% after supplementing. L-carnosine helps to maintain already healthy lactic acid levels.

What is L-carnosine?

L-carnosine is a di-peptide that binds to hydrogen ions, as an intracellular buffer. Carnosine helps muscular pH by soaking up hydrogen ions (H+) that are released at an accelerated rate during exercise.

How do I know if I can benefit?

Myodurance™ can offer benefits to anyone who is subject to extended amounts of physical activity.

The unique combination of beta-alanine, L-carnosine, and hyaluronic acid help support the muscular and connective tissue systems as well as the joint and skeletal structures of the legs and joints. Due to the large amounts of stress on both of these systems in any of the previously stated disciplines, Myodurance™ is the product you need to work out harder and longer.

Will the ingredients in Myodurance™ cause a test positive?

The natural ingredients in Myodurance™, hyaluronic acid, beta-alanine, and L-carnosine are naturally occurring substances. These will not create a test positive in steroid or HGH (human growth hormone) tests that are given for various competitive events.

Is Myodurance™ natural?

Yes it is. L-carnosine, beta-alanine, and hyaluronic acid are all naturally occurring substances found in the body. Myodurance™ just adds the extra carnosine and hyaluronic acid needed to support our levels in preparation for strenuous activity.

Is Myodurance™ used with other supplements?

Yes it is. Myodurance™ is regularly used with other supplements. Customers have not changed their previous food/supplementation regimens.

Supplement Facts

Serving Size 1 lozenge	Servings Per Container 30
Amount Per Serving	% Daily Value
Beta-Alanine	1000 mg *
L-Carnosine	150 mg *
Hyaluronic Acid	10 mg *

* Daily Value not established.

Other Ingredients: Isomalt, natural mixed berry flavor, palm stearate, stevia powder.

Directions: As a dietary supplement, consume 1 lozenge once daily or as needed. For best results, take 2 hours prior to strenuous activity and let lozenge dissolve completely before swallowing. NOTE: Beta-alanine may cause a harmless, temporary tingling sensation on the skin for some individuals. This usually subsides with continued use.

Warning: Consult your physician prior to using this product if you are pregnant, nursing, taking medication or have a medical condition. Tamper resistant. Do not use if seal is broken. Keep out of reach of children. Store in cool, dry place.
